Examen de inglés intermedio – Reading The Industrial Revolution was a period of significant change that took place in Europe and North America during the 18th and 19th centuries, marking a shift from an agrarian and handicraft economy to one dominated by industry and machine manufacturing. This revolution brought about major advancements in technology, transportation, and production processes. Steam power, the invention of the steam engine, played a crucial role in powering factories and machinery, leading to increased efficiency and productivity. As a result, there was a rapid expansion of factories, urbanization, and a shift in the workforce from rural areas to cities. 1. What was the Industrial Revolution? a) A period of significant change in Europe and North America. b) A revolution in agriculture and handicrafts. c) A shift from industry to agriculture. d) A technological advancement in transportation. 2.
